Design Doc Info Dump

- ## <u>Login Page:</u>
  - ○ Purpose:
    - ■ Allow registered users to log in or continue as a guest
      - ● Logged in users have access to saving custom lists and a friends list
  - ○ Features:
    - ■ A Navbar with links to Sign in and Register Pages
    - ■ Box Containing
      - ● Email & Password Field for user login
      - ● A sign-in button
      - ● A register button that links to the Register Page
      - ● A continue as a guest button so people can access the site without logging in
        - ○ No access to custom list saving, friends list, or notification feed.
    - ■ The signing Page will have authentication functionality
      - ● Must have an account to sign in
- ## <u>Register Page:</u>
- ● Visual Speculative Example:
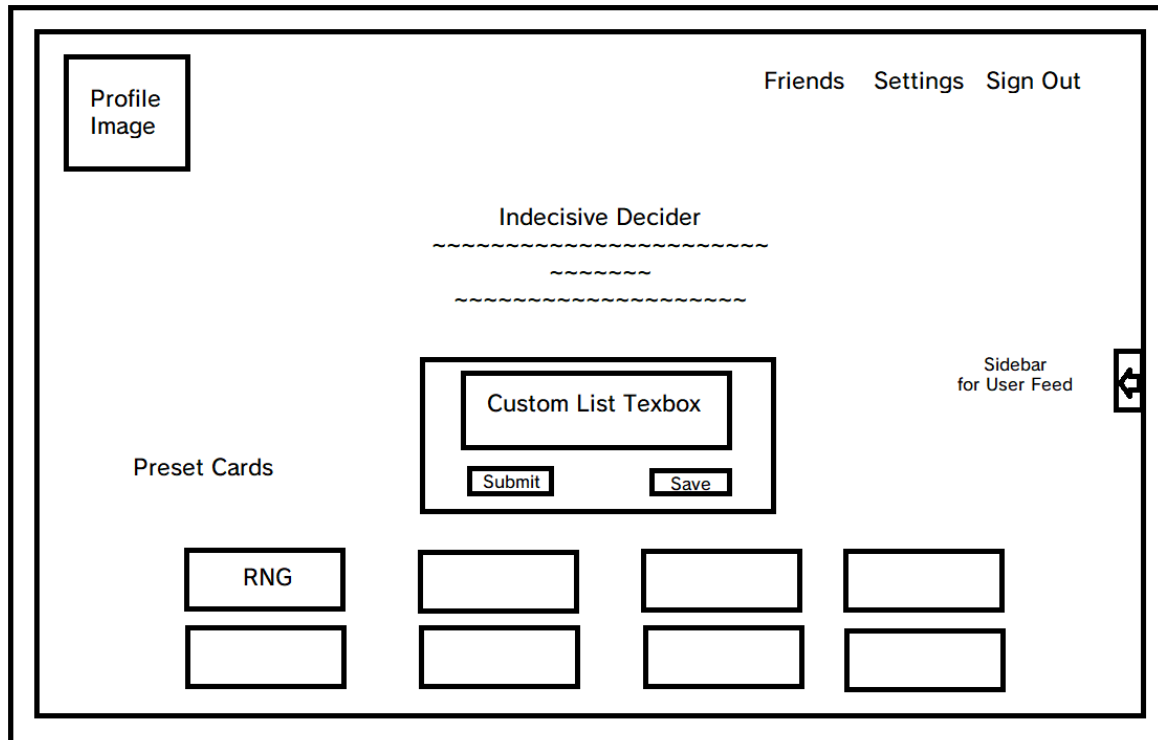

○ Purpose:
  ■ Allow people to register an account on the website
○ Features:
  ■ A Navbar with links to Sign in and Register Pages
  ■ Box Containing
    ● Name Field
    ● Email Field
    ● Password Field
    ● A submit button for sending the new user account to the backend
    ● A continue as a guest button so people can access the site without logging in
  ■ Register Page will not allow registering of accounts using the same email address. No accounts can have the same email address.

● <u>Main Page:</u>
● Visual Speculative Example:

A wireframe diagram showing a page layout:
- Top left: **Profile Image** (box)
- Top right: **Friends Settings Sign Out**
- Center title: **Indecisive Decider** with squiggly underlines
- Right side: **Sidebar for User Feed**
- Center box: **Custom List Texbox** with **Submit** and **Save** buttons
- Left: **Preset Cards**
- Grid of boxes, first labeled **RNG**

- ○ Purpose:
  - ■ To give the user access to the Animated RNG aspect of the project!
- ○ Features:
  - ■ NavBar
    - ● Contains:
      - ○ Sign Out
        - ■ This will sign you out and bring you back to the Login page
      - ○ Settings
        - ■ This will bring you to the settings page to change the information of your user.
        - ■ Only accessible if logged in
      - ○ Friends
        - ■ This will bring you to the friend's page to manage your friends and find friends to add/remove.

- ■ Only accessible if logged in
- ■ Profile Image in Top Left
  - ● Can be changed in Settings Page
- ■ Text for Page Description
  - ● Includes welcome message and how to use the website
- ■ Small Checkbox for Animation Toggle
  - ● Allows you to not have animations on the page or not.
- ■ Result Textbox
  - ● Shows result of RNG stuff
    - ○ Allows you to send your result with a comment to the public/friends user feeds, or not to do that.
- ■ Custom List Preset TextBox
  - ● Submit Button, then a popup Appears with animation/result after being computed by RNG code. After the popup gets removed/exited, the result will be displayed as text above it.
  - ● Save Button, to save that list in your user's database to be used later
    - ○ Only accessible if logged in
  - ● Load Button, to select from the lists saved in the database with the user.
    - ○ Only accessible if logged in
- ■ Standard Presets Buttons
  - ● Clicking any of the buttons below will give you a popup with animation or result for the stated preset.
- ■ Side tab with User Feed
  - ● Contains your friend's and the public's recent comments on their luck/decision and you can react to their comments.
  - ● Only accessible if logged in

● <u>Settings Page:</u>

```

- ○ Purpose:
  - ■ Page for adding and removing friends

- ○ Features:
  - ■ A list of all the friends the user has.
    - ● [X] buttons on the side of friends to be able to remove them.
  - ■ Textbox for adding friends through IDs or Email or Name.
    - ● simple implementation to find specific people.
  - ■ Bigger Notifications Feed
    - ● A bigger version of the side-bar notification feed on the Main Page.
    - ● Maybe add functionality to add friends from there?
